

BIDPRO-DOC-001

Official Research Prospectus

Version 2.0

Executive Message

Procurement plays a vital role in South Africa's economic development. The BidPro Procurement Intelligence Research Programme 2026 was established to better understand procurement practices, digital transformation and technology adoption through independent national research.

About BidPro

BidPro is a South African procurement technology platform established to support procurement transformation through intelligent technology, research and innovation.

Vision

To become Africa's leading procurement intelligence platform.

Mission

To transform procurement through intelligent technology and research.

The Procurement Landscape

Procurement has become a strategic discipline supported by digital transformation and technology.

About the Research Programme

An independent national initiative collecting evidence-based procurement insights.

Research Objectives

Understand procurement practices; measure digital transformation; identify challenges; explore emerging technologies; promote collaboration; inform innovation.

Research Scope

Procurement governance, supplier engagement, digital transformation, procurement technology, AI awareness, reporting and innovation.

Who Should Participate

Government, municipalities, SOEs, universities, TVET colleges, healthcare institutions, private organisations, SMEs, suppliers and procurement professionals.

Expected Outcomes

Evidence-based insights and publication of the 2026 South African Procurement Technology Insights Report.
