

BIDPRO-DOC-002

Executive Research Brief
Version 2.0

Executive Overview

The BidPro Procurement Intelligence Research Programme 2026 is an independent national research initiative established to better understand procurement practices, digital transformation and technology adoption across South Africa. Participation is voluntary, confidential and takes approximately 8–10 minutes.

Why This Research Matters

The programme seeks to generate evidence-based insights into procurement technology adoption, operational challenges and opportunities for innovation across South Africa.

Research Objectives

- Understand procurement practices
- Measure digital transformation
- Identify procurement challenges
- Explore procurement technology adoption
- Capture industry perspectives
- Produce evidence-based national insights

Who Should Participate

Government Departments, Municipalities, State-Owned Enterprises, Public Entities, Universities, TVET Colleges, Healthcare Institutions, Private Organisations, SMEs, Procurement Professionals, Suppliers and Technology Providers.

Research at a Glance

Research Focus: Procurement practices, digital transformation and technology adoption.

Survey Duration: 8–10 minutes.

Research Output: 2026 South African Procurement Technology Insights Report.

Confidentiality Commitment

Participation is voluntary. Responses are analysed in aggregated form and individual organisations are not identified without permission.
